CPI : 8.02/10	<i>Nov 2023 – May 2027</i>
97.67%	<i>March 2020 – March 2021</i>
78%	<i>March 2021 – March 2023</i>
98.90 PR	<i>2023</i>
88 PR	<i>2023</i>

Technical Skills

- **Languages:** Python, C/C++, Java, C#, JavaScript, HTML/CSS
- **Frameworks/Libraries:** Django, React, Node.js, .NET framework, ASP.NET Core
- **Databases:** PostgreSQL, MySQL, SQLite, MongoDB, Redis
- **Cloud & DevOps:** AWS (Elastic Beanstalk, RDS, EC2), Docker, Git/GitHub
- **Tools & Protocols:** WebSockets, Celery, REST APIs, Postman, VS Code, Visual Studio

Experience

Software Developer Intern

8 Months

Arishti DEV

May 2025 – Dec 2025

- Engineered the interactive frontend and core logic for **Advance Cyber Kiosk Plus**, a digital forensic solution used by NFSU to scan mobile devices and USB storage for cyber threats.
- Developed the kiosk application using **Qt Framework (QML & C++)** and architected real-time, bi-directional client-server communication with a **.NET** backend utilizing **WebSockets**.
- Facilitated automated threat analysis modules to identify malicious applications and generate secure, tamper-proof forensic reports for institutional use.

Projects

Aegis (Automated CVE-based Host Vulnerability Scanner) 🛡️

Python, Django, Celery, Redis, ML, Docker

- Engineered an automated host scanner utilizing deterministic CVSS data to accurately map CVEs and CPEs against the NVD database across LAN-connected devices.
- Implemented an anomaly detection module using the Isolation Forest algorithm to continuously monitor and flag unauthorized changes in port states and service versions.
- Designed an automated scheduling pipeline using Celery and Redis to execute daily security assessments and generate comprehensive reports.

OptiDoc 🌐 🌐

React.js, Node.js, Express, MongoDB

- Developed a scalable doctor-patient appointment system featuring real-time slot booking utilizing the full **MERN stack**.
- Built responsive, high-performance frontends enabling patients to book slots seamlessly while allowing doctors full control over schedule management.

LedgerLink 🌐 🌐

.NET 8.0 MVC, PostgreSQL, Docker, AWS (Elastic Beanstalk, RDS), EF Core

- Developed a multi-tenant credit management system enabling local merchants to securely manage customer profiles, track credits, and automate transaction logging.
- Containerized the application using Docker and deployed it to AWS Elastic Beanstalk connected to a publicly accessible AWS RDS PostgreSQL database instance.
- Implemented QR code-based customer identification and integrated a secure SMTP email service to automatically send transaction receipts and system notifications.

Publications & Research

Research Paper: Aegis – An Integrated System for Automated Vulnerability Scanning 📄

In Progress

- Currently drafting a comprehensive research paper detailing the architecture and implementation of the Aegis project, specifically focusing on Behavioral Anomaly Detection using Isolation Forest.
- Exploring the effectiveness of deterministic CVSS data mapping and unsupervised machine learning for network anomaly detection.

Competitive Programming

- Solved **195+** problems on [LeetCode](https://leetcode.com/).
- Solved **350+** problems on [CodeChef](https://www.codechef.com/).
